

Gravity

Gravity is the force that we call “the law of mutual attraction.”

It is a spiritual force which is why scientists are struggling to comprehend it.

It varies in its force by the degree of attraction that the spiritual aspect of any two planets can exert on each other which, in turn, is dependent on the degree of spirituality of the beings associated with those planets.

This degree of spirituality is the degree that the God Force can be projected by these beings.

Thus gravity is, as was mentioned, the law of mutual attraction and is, in turn, directly associated with the God Force.

This will be discovered by scientists long years into the future as the degree of spirituality of humanity on Earth develops as the light of God, which is now shining on us, allows us to develop spiritually.
