

Plasma Belt

Humanity on Earth is sending out information from their physical bodies and their auras all the time.

You may picture it as the way that heat radiates from living objects, the result of the life force processing matter and rejecting unwanted matter as heat, among other things.

So, this so called plasma field surrounding Earth and reaching far into space, is quite simply unretained spiritual energy radiating from humans and animals and, to a degree, all life forms.

It has to go somewhere so it gathers as a sort of cloud around planet Earth.
