

Toth

History, particularly esoteric history, contains many documents purporting to describe an aspect of life in one way or another.

Some of these were dictated from the heavenly spheres by knowledgeable beings, some by entities of less than good intent and some are just the figments of the imagination of a “channeller”.

Then there are, of course, those messages that started out as truth but became corrupted over time.

Now the Emerald tablets of Thoth are a mixture of the above.

They started out quite a long time ago as a message from wise beings but, over time and through numerous translations, some of which are accurate and some of which contain “poetic license”, the meanings of certain chapters have been altered.

So, there is not a yes/no answer concerning those tablets.

They contain truth but should be read with caution trying to analyse which parts ring true and which do not.
