

Voynich manuscript.

The Voynich manuscript is a document that was transmitted, psychically, by the process known as channelling by an entity from what you would call a parallel dimension.

The person who wrote it was a trance medium and his mind and body was taken over by this entity who wrote the document.

The language used was not one known on Earth.

The object of creating this document was to awaken people to the fact that there is life in many dimensions outside of 3D reality.

When mankind develops sufficiently, it will be translated - not before.
